

T-GUARD ULTRA

Valpar Micro Matic are excited to introduce the latest in flexible tubing technology, T-Guard Ultra. A multi-layer tubing with an ultra-smooth inner layer, preventing bacterial adhesion and loss of product quality, with a highly flexible outer layer making it Valpar Micro Matic's most flexible product.

T-Guard Ultra has been developed using a phthalate free plasticiser, intended to provide our customers with both peace-of-mind, and a product which leaves no room for any compromise in quality.

Perfectly suited for Bag-in-Box, cask ale and gas applications, T-Guard Ultra is designed to improve the overall quality of your dispense system.

SPECIFICATION HIGHLIGHTS:

APPLICATIONS:

Certifications:

- T-Guard Ultra has been certified for use in food and beverage applications by the National Sanitation Foundation (NSF-51)
- T-Guard Ultra also conforms to the EU regulation for plastic materials which encounter food (EU 10/2011).

Why T-Guard Ultra?

- Offers high flexibility and kink resistance.
- Organoleptic testing has shown that T-Guard Ultra has a significantly low potential of tainting and imparting notorious 'plastic' flavours into beverage as seen with other PVC tubing in the market.
- The ultra smooth inner layer prevents loss of product quality and prevents bacterial adhesion to the surface.
- A phthalate free tube which fully conforms to EU regulations.
