

Rattler II
Bar dispenser

R A T T L E R

Rattler II Bar dispenser

**MANIFOLD IS
COMPATIBLE
WITH BOTH FLOW
CONTROL AND
MECHANICAL
MODULES**

OVERVIEW

The Rattler is a high-quality, high-performance bargain that is designed to dispense post-mix carbonated and non-carbonated beverages, including soft drinks, juice and energy drinks. The nozzle and diffuser are designed to eliminate product carryover, while meeting industry standards for ratio in all current high-yield syrups.

The precision-engineered molded flow controls regulate flow regardless of incoming pressure changes. The independent valve design utilizes stainless steel collars, integrated positive shutoffs and double O-rings to prevent leaks and prolong service intervals.

Manufactured in the USA, the Rattler is user friendly and durable, and the removable valve cover and nozzle provide for easy cleaning. The handle is made from durable cast acrylic and is available with various hose lengths. The Rattler is designed with interchangeable valves and manifold for each service and compatibility with existing installed equipment.

PERFORMANCE

- Nozzle and diffuser designed to eliminate product carryover
- Meets industry standards for ratio in all current and high yield syrups
- Precision engineered, molded flow controls regulate flow rate regardless of incoming pressure changes

QUALITY

- Handle manufactured from durable cast acrylic
- Valve integrated positive shut-offs and double O-rings prevent leaks and prolong service intervals
- Independent valve design utilizes stainless steel collars to seal shut-offs and flow controls

PRODUCT HIGHLIGHTS

- Manifold is compatible with both flow control and mechanical modules
- Captive O-ring design prevents leaks, and makes service of internal handle easier
- One gun dispenses multiple products including soda, tonic, juice and energy drinks
- Valve cover and removable nozzle provides easy cleanability
- Interchangeable manifold design
- User friendly holster engineered with ½" drain and quick release
- Available in various hose lengths
